1. **Explain the importance of the following factors in the development of a country's economy:**
 a. **Human Resources:** The quality and quantity of the labor force, including education, skills, and health, are crucial for economic growth. A well-educated and healthy workforce can drive innovation and productivity.
 b. **Capital Resources:** The availability of financial resources for investment in infrastructure, technology, and human capital is essential for economic development. Access to capital markets and foreign investment can provide the necessary funds.
 c. **Technology:** Technological innovation and adoption are key drivers of economic growth. Investment in research and development, as well as the diffusion of technology, can lead to higher productivity and new industries.
 d. **Infrastructure:** A robust infrastructure, including roads, ports, and communication networks, is vital for trade, commerce, and the efficient movement of goods and services.
 e. **Government Policy:** Sound economic policies, including stable macroeconomic management, trade liberalization, and investment promotion, are necessary to create a favorable environment for economic growth.
 f. **Geographical Location:** A country's location relative to major trade routes and markets can significantly influence its economic prospects. Proximity to large markets can facilitate trade and investment.
 g. **Political Stability:** A stable political environment is essential for attracting investment and implementing long-term economic development plans. Political instability can deter investment and hinder growth.
 h. **Legal System:** A strong and transparent legal system, particularly in contract enforcement and property rights, is crucial for fostering a business-friendly environment and attracting investment.
 i. **Globalization:** Integration into the global economy through trade and investment can provide access to larger markets, technology, and capital, driving economic growth.
 j. **Environmental Sustainability:** Sustainable economic development requires the responsible management of natural resources and the mitigation of environmental degradation. A healthy environment is essential for long-term economic growth and well-being.
